

This camera is similar to a c-mount type camera except that the lens is built-in (no need to purchase separately). It comes with a powerful 27X zoom 3.2 to 86.4mm varifocal lens. The focus and zoom can be controlled via buttons on the back (see additional photos) or via RS-485 Pelco-D protocol. The built-in On Screen Display (OSD) menu lets you adjust the backlight compensation, focus, zoom, and camera id. It can be used indoors, or outdoors in a housing.

### Product Features

- Built-in 3.9 to 85.8mm Varifocal Lens
- Day / Night
- On Screen Display
- RS-485 control

### Specifications

- 1/4" Sony Day/Night CCD
